

Wildflower Hotspot #3

WHERE:

Bodie Hills, BLM Bishop Field Office

WILDFLOWERS TO SEE:

Sulphur buckwheat (*Eriogonum umbellatum*) – **Yellow flowers clustered in heads on short stems emanating from the base of the plant. (*)**

Larkspur (*Delphinium andersonii*) – **Tall stemmed dark purple flower with a little spur. (*)**

Applegate's paintbrush (*Castilleja applegatei*) – **Red flower with resinous, wavy leaves. (*)**

Balsam-Root (*Balsamorhiza hirsute*) – **Bright yellow daisy-like flower on medium long stems with wavy leaves. (*)**

Anderson's lupine (*Lupinus andersonii*) – **White-flowered lupine with long stems. (*)**

Silver lupine (*Lupinus argenteus*) – **Common blue-flowered lupine. (*)**

Cushion phlox (*Phlox condensate*) – **Light pink flowered, cushion-like plant. (*)**

Site Legend:

* **Upland site – Dry/Rocky**
~ **Wet spring/meadow site**
*~ **(Moist rocky faces)**

WHEN TO GO: May-June

HOW TO GET THERE: Go north on U.S. Hwy. 395 north of Mono Lake and Conway Summit – Approximately 25 miles. Take the Bodie Hills Road (State Route 270) and drive towards Bodie State Park. You can stop anywhere you find an appropriate pull-out. From the State Park you can also take the Geiger Grade Road which is a dirt road bisecting the Bodie Hills to the west. A high clearance vehicle is recommended for this route.

MORE WILDFLOWERS TO SEE:

Mariposa lily (*Calochortus bruneaunis*) – **Creamy white lily on slender green stem. (*)**

Dugaldia (*Dugaldia hoopesii*) – **Large yellow daisy flower on stout, fleshy, stems. (~)**

Hawksbeard (*Crepis intermedia*) – **Medium sized yellow daisy with basal and stem leaves entire to wavy in shape. (*)**

Showy penstemon (*Penstemon speciosus*) – **Sky blue, long throated flower with white inside and smooth, clasping leaves. (*)**

Desert columbine (*Aquilegia formosa*) – **Red flower with five petals and spurs. Flower center is yellow. (*~)**

Please do not pick the flowers! Leave them for others to enjoy.

In cooperation with the Eastern Sierra Interpretive Association and the California Native Plant Society (Bristlecone Chapter).
